 [Scale your control with Micro800 controllers](#)

The Allen Bradley Micro800 controller, together with the Connected Components Workbench™ software provide a flexible and customizable Micro Control solution for your standalone machine development.

Available in different form factors, these micro controllers are optimized to deliver a smart, productive and secure solution throughout all phases of the machine lifecycle. For instance, the Micro810® controller with a nano-sized footprint is suitable for smart relay applications, while the Micro820® controller is optimized for smaller standalone machines and remote automation projects with Ethernet connectivity. Finally, the Micro850® controller is an optimal choice for larger standalone applications that require flexible communications and greater I/O capabilities.

Experience the Micro800 controller capabilities today.
